Team 4 agreement

| Name | Student ID |
|---|---|
| Slater | 106425434@student.swin.edu.au |
| Joshua Joshi | 106216450@student.swin.edu.au |
| Jermaine Michael | 106508209@student.swin.edu.au |
| Het Patel | 105254776@student.swin.edu.au |
| Ahmed Agan | 106522034@student.swin.edu.au |

Availability:
Slater;

Monday, Tuesday, Wednesday, weekends from 6pm

Thursday, Friday NA

Het – Thursday, Friday and Weekends from 2:PM

- Monday to Wednesday after 7:PM

Jermaine – Monday 3pm-6pm, Tuesday 7pm onwards, Thursday 4pm onwards, Friday depends

Joshua: 7pm to 12 pm on Thursday, Friday, Monday (from 8:30). Evenings on weekends

Ahmed- Monday 4pm onwards, Tuesday 5pm onwards, Thursday 7pm onwards, Friday 1pm onwards

## How will we approach working as a group?

Idk

Communicating our ideas without fear of ridicule

Fairly distributing workload

Ensuring that we get it done on time

## What behaviours will help our group?

Showing up to class, proactively reaching out to team members

Sharing ideas with each other

## What behaviours will harm our group?

Not showing up to class

Not equally contributing

Not saying anything in group chats?

Putting zip bombs as links

## How will we handle disagreements?

Bring it up with group first, see what everyone has to say and find a middle ground that works for the majority

## How will we make sure everyone has a chance to contribute?

Assign jobs at the start of the task, check up with peers on progress of the job

# Activity 3

Grafton community centre:
Grafton South Aboriginal Early Years Centre is an Aboriginal community-controlled early childhood centre located in Grafton, NSW. The centre supports families from nearby communities, small settlements and outlying properties. The centre offers long day care, preschool/kindergarten, family support, transition-to-school activities, cultural learning programs and referral connections to health and community services. Like many Aboriginal and Torres Strait Islander-led early childhood services, it aims to help children grow up strong in culture, connected to family and community, and ready to thrive at school.

The centre is led by community and governed through an Aboriginal community-controlled structure. Staff include educators, Aboriginal family support workers, a centre director, visiting allied professionals and local cultural knowledge holders. The service is respected because it is seen as a place where children are not only cared for and educated, but also valued, affirmed and supported in their identity. SNAICC's current guidance makes clear that Aboriginal and Torres Strait Islander-led early childhood education and care services play a distinctive role in strengthening cultural identity, supporting families facing vulnerability, and integrating learning with health, family and early intervention supports.

As part of its future planning, the centre is exploring how technology may help support its operations and services while maintaining a culturally safe, child-safe and community-led approach. The centre has engaged your team to help understand organisational priorities, stakeholder needs and opportunities for future technology support before any technology decisions are made.

## Activity 3:

### 4-6 opportunities, concerms. Questions or tensions from the case study

Opportunities:

- One opportunity is exploring the technology available and expanding on it to better support its operations & services, whilst maintaining an environment that is culturally safe, child safe, and community driven
- Another opportunity is providing more services towards early childcare and education with Aboriginal and Torres Strait Islander youths.

Questions:

- A question regarding the implementation of technology at the early years centre is how technology can be safely implemented, making sure the information of the children being taken care of is secure
- Another question is how this technology implementation could positively impact the development of the kids, as technology can be used as a way to empower learning, in this case potentially strengthening their bond to their culture.

Concerns:

- One concern that arises from the implementation of technology in the early learning centre is if the technology would be helping the children learn more/in addition to the teaching or if it would be a distractor that the educators would use in lieu of teaching the students

## A simple map or short explanation of how these are connected

These Questions, concerns and opportunities mainly revolve around the children and how they positively and negatively impact the youth they care for. Technology can deepen their bond with their culture and support their indigenous heritage, but it can equally isolate them from that culture.

Overall while the drawbacks of technology implementation are valid, there are just as many upsides that effect the youth in interesting ways.

## 2-3 Priority questions the organisation should explore before making technology decisions

- will the new technology that will be implemented help with deliverance of better cultural knowledge and will it help prepare the children for their school days

- what process will the organisation follow to ensure that all the children's information is secure

- what procedures will be implemented to make sure the learning of the children doesn't backfire and have an inverse effect?

Every technology implemented should be centred around child development.

This can be achieved through bringing technology to classrooms, school offices and communal areas.

- Is a child-safe, secure internet connection established? and is proper tech and infrastructure ensured in child services?
- Is the classroom self-sufficient enough to perform and coordinate activities without support from third party organisations?
- Are the admins and officials managing the schools and the communal areas qualified enough to operate latest tech without outside help?
