

What's next? Week 5

For Week 5, we will turn our attention to stakeholders and explore the different individuals, groups and communities who may be affected by, influence, or contribute to a technology project.

Ahead of workshop 5, review your team's case study and identify the key stakeholders who may have an interest in, influence over, or be affected by the project. This may include community members, Traditional Owners, Elders, government agencies, technology providers, researchers, businesses, or end users.

In Canvas, your team should create a list of:

- 10–15 stakeholder candidates
- From that list, identify 5–8 priority stakeholders with evidence and rationale for why they are key to this project
- Have a first go at applying the Five Rights to your priority stakeholders

You will find that the concepts from Weeks 2 to 4, including Designing with Country, community contexts, Two-Eyed Seeing and the Five Rights, provide useful foundations for analysing stakeholders and their relationships.

Your team might also like to create a shared document for your engagement proposal and start with setting up headings and sections.

To prepare effectively for the next week, complete all outstanding learning content for this topic, before navigating to week 5.

Before class:
list of 10-15 stakeholders

1. Local ACCO
2. NSW Department of education
3. Child Educators and support Staff
4. The Local/Regional AECG of Grafton https://www.aecg.nsw.edu.au/regions-upper-north-coast
5. Local cultural knowledge holders (Elders)
6. Communal Business and Indigenous Corp
7. Families and community
8. Professionals experienced with Indigenous Integrated real-world projects.
9. SNAICC
10. Guidance from organisations and companies like CSIRO, Indigital
11. Experts in Local Gumbaynggirr Language Integration
12. The kids in the daycare

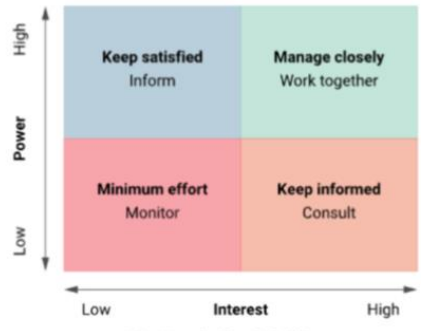

List of 5-8 priority stakeholders

1. Families and community
2. Child educators and support staff
3. Elders
4. SNAICC
5. Users
6. The kids in the daycare

Apply the 5 rights to the stakeholders

Right People	Right Place	Right Language	Right Time	Right Way
Elders are the right people as they are knowledgeable regarding the community	Our stakeholders would most likely want to meet either at an agreed upon spot or at their land	We should ask our stakeholders what the correct terms are to communicate clearly with them	Recognising the obligations of the stakeholders, communicating quickly and efficiently	Conducting meetings and constructing our project in a respectful way for the shareholders

Assignment work:

The 'Standard' stakeholder map
Reproduced from the influence agenda by Dr Mike Clayton (Palgrave Macmillan)

Power/Interest rate (2023) created by Swinburne Online

Stakeholder mapping	**1 to >0.75 Pts** **Proficient** Identifies a comprehensive and relevant range of stakeholders and clearly demonstrates meaningful connections, relationships, and responsibilities between them. Demonstrates team collaboration through equitable distribution of work, active participation by all members, constructive challenge and refinement of ideas, and shared decision-making.	**0.75 to >0.5 Pts** **Developing** Identifies several relevant stakeholders and demonstrates some meaningful connections, relationships, and responsibilities between them. Demonstrates effective team collaboration through participation by most members, division of work, and discussion that contributes to team decisions and idea development.	**0.5 to >0.25 Pts** **Satisfactory** Identifies basic stakeholders with limited explanation of their roles, relationships, or responsibilities. Demonstrates limited evidence of team collaboration, with some participation in discussion and contribution to group tasks.	**0.25 to >0.0 Pts** **Needs improvement** Identifies few stakeholders, with unclear, inaccurate, or missing connections, relationships, and responsibilities. Demonstrates little or no evidence of meaningful team collaboration, discussion, or contribution to group tasks.	**0 Pts** **No marks** No submission or no meaningful contribution in class.	1 pts
Stakeholder perspectives and questions	**2 to >1.5 Pts** **Proficient** Demonstrates insightful consideration of stakeholder priorities, concerns, needs, and questions. Clearly recognises diverse perspectives and identifies meaningful opportunities for further investigation. Demonstrates high-quality team collaboration through equitable contribution, active participation by all members, constructive evaluation of ideas, and shared development of workshop outcomes.	**1.5 to >1.0 Pts** **Developing** Identifies several relevant stakeholder perspectives, concerns, and questions. Demonstrates consideration of differing viewpoints and their implications, with some opportunities for further investigation identified. Demonstrates effective collaboration through participation by most team members, constructive discussion, and shared development of ideas during the workshop.	**1 to >0.5 Pts** **Satisfactory** Identifies some relevant stakeholder perspectives, concerns, or questions, but analysis is limited, descriptive, or incomplete. Demonstrates limited evidence of collaboration, with some participation in discussion and contribution to workshop activities.	**0.5 to >0.0 Pts** **Needs improvement** Identifies few or no relevant stakeholder perspectives, concerns, or questions. Analysis is minimal, unclear, or inaccurate. Demonstrates little or no evidence of meaningful collaboration or contribution to workshop activities.	**0 Pts** **No marks** No submission or no meaningful contribution.	2 pts

<u>Case study stuff</u>

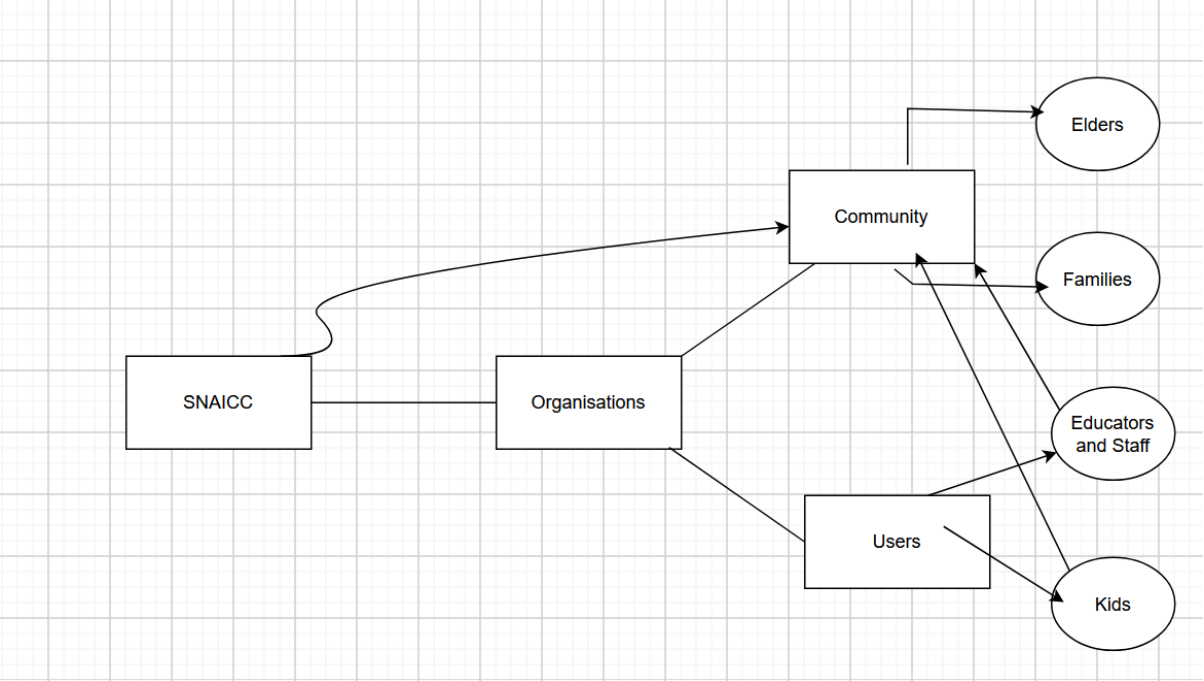

Grafton community centre:

Grafton South Aboriginal Early Years Centre is an Aboriginal community-controlled early childhood centre located in Grafton, NSW. The centre supports families from nearby communities, small settlements and outlying properties. The centre offers long day care, preschool/kindergarten, family support, transition-to-school activities, cultural learning programs and referral connections to health and community services. Like many Aboriginal and Torres Strait Islander-led early childhood services, it aims to help children grow up strong in culture, connected to family and community, and ready to thrive at school.

The centre is led by community and governed through an Aboriginal community-controlled structure. Staff include educators, Aboriginal family support workers, a centre director, visiting allied professionals and local cultural knowledge holders. The service is respected because it is seen as a place where children are not only cared for and educated, but also valued, affirmed and supported in their identity. SNAICC's current guidance makes clear that Aboriginal and Torres Strait Islander-led early childhood education and care services play a distinctive role in strengthening cultural

identity, supporting families facing vulnerability, and integrating learning with health, family and early intervention supports.
As part of its future planning, the centre is exploring how technology may help support its operations and services while maintaining a culturally safe, child-safe and community-led approach. The centre has engaged your team to help understand organisational priorities, stakeholder needs and opportunities for future technology support before any technology decisions are made.

Activity 2: Mindmap

Activity 3:

Priority Stakeholder	What might matter to them?	Possible concerns	Questions we might ask them
Families	quality of Education & the facilities being provided to their children	how and who will provide the cultural knowledge Will the teachers be open to ideas from the surrounding community to help teach the kids about Indigenous topics?	Do you think the language and terms used while teaching the kids are appropriate? Are there any areas that we (Grafton South Aboriginal Early Years Centre) can improve the

			kids' connection to Culture
Child Educators	Resources to provide quality education	Will the new technology help deliver knowledge to the children in a safe manner?	What are some new facilities or services you would like to use? Choose from our following services which you might see fit for your organisation.
Elders	Properly passing on their cultural knowledge to the younger generation	Is the knowledge & traditions that make up their culture being taught and passed down to the younger generation properly?	How do they feel about the current ways that their knowledge of their culture is passed down?
SNAICC	Strengthening the system that support children to grow up in a safe, nurturing and supportive environment within their family, community, culture and Country Actively closing opportunity gaps for all children, ensuring that reforms result in tangible improvements for children.	Are the early childhood development systems, services and supports so that they are accessible, effective and sustainable?	Is there a specific roadmap or set of guidelines we must adhere to? What are SNAICC' suggestions and feedback to the system and services we have implemented? What sort of professional support can SNAICC provide for us?
Users	The functionality of the new technology	Is it an easy technology to adapt to? Is this being built alongside elders & people with deep knowledge about	Is this being built for their community or with the community? How easy is it to take and implement different ideas from

		their culture & education?	their Indigenous culture?
Kids In Daycare	The way they engage with the learning & the content of what they learn	Is the education provided to the children enjoyable & is the new information that they are learning being taught in a proper way	Do the ways that the teachers teach help you understand more about Indigenous culture?

Activity 4:

Stake Holders	approach	How does it help us understand	Is the approach suitable & why	Risk & limitation	Connection to the 5 rights
Families	Consult families on their issues	What families are concerned about	Yes, it is suitable as it will get concerns in a direct manner	Families aren't always available	Making sure we ask right people
Child Educators	Hold meeting with educators	What is needed to educate children further	Yes, because it can assist them in the way they teach	Technical knowledge of the educators is important for successful implementation which might be limited	Being respectful of their time (right time)
elders	Ask individual elders what technology could solve	What technologies the elders view as beneficial for the community	Yes, as their input is highly valued	Might have disagreements with the services and new tech	Using the right language and terms
SNAICC	Meeting with upper management	How SNAICC's logistics could achieve the project goals	Yes, this will allow us to take notes of the meeting and streamline project	Limited availability in reaching them	Right language

			developmen t		
Kids	Talking with them during classes or via an assembly	What the students are taking in and what is not sticking	Yes, because the kids are the ones being impacted by the technology	May not understand the concepts as well as everyone else	Sorting out the right place to discuss
Users	Surveys to ask about what we could improve on	What users want out of the project	Yes, because we can get lots of data easily	Might have bad responses through surveys	Doing things in the right way for user experience
